DETAILED ACTION

Claim Rejections - 35 USC § 112

1. The following is a quotation of the second paragraph of 35 U.S.C. 112:

The specification shall conclude with one or more claims particularly pointing out and distinctly claiming the subject matter which the applicant regards as his invention.

Claims 4-8, 13-17, 23-27, 33 and 34 contain the trademark/trade names **UNIX and Linux**. Where a trademark or trade name is used in a claim as a limitation to identify or describe a particular material or product, the claim does not comply with the requirements of 35 U.S.C. 112, second paragraph. See *Ex parte Simpson*, 218 USPQ 1020 (Bd. App. 1982). The claim scope is uncertain since the trademark or trade name cannot be used properly to identify any particular material or product. A trademark or trade name is used to identify a source of goods, and not the goods themselves. Thus, a trademark or trade name does not identify or describe the goods associated with the trademark or trade name. In the present case, the trademark/trade name is used to identify/describe "operating system" and, accordingly, the identification/description is indefinite.

Claim Rejections - 35 USC § 102

2. The following is a quotation of the appropriate paragraphs of 35 U.S.C. 102 that form the basis for the rejections under this section made in this Office action:

A person shall be entitled to a patent unless –

(e) the invention was described in (1) an application for patent, published under section 122(b), by another filed in the United States before the invention by the applicant for patent or (2) a patent granted on an application for patent by another filed in the United States before the invention by the applicant for patent, except that an international application filed under the treaty defined in section 351(a) shall have the effects for purposes of this subsection of an application filed in the United States only if the international application designated the United States and was published under Article 21(2) of such treaty in the English language.

Art Unit: 2614

3. Claims 23-34 are rejected under 35 U.S.C. 102(e) as being anticipated by Yazdi et al (2005/0135259).

Consider claim 23, Yazdi et al teach a method for testing a media platform, comprising: providing executable instructions for control scripts and validation scripts to a tester having a [UNIX] based operating system; providing executable instructions for control scripts and validation scripts to a media platform having a non-[UNIX] based operating system; and executing a media platform test routine between the tester and the media platform based on the control scripts and the validation scripts (abstract; paragraphs 0005, 0007, 0014, 0058, 0067-0073).

Consider claims 24-27, paragraphs 0005, 0007, 0014, 0058, 0067-0073 read on the claimed features.

Consider claims 28 and 33, Yazdi et al teach a method and computer readable medium for testing a media platform, comprising: multiplexing media channels of a tester having a DS3 type media card to media channels of a media platform having a media card of a different type; and performing a media platform test routine between the tester and the media platform by executing control scripts and validation scripts on the tester and the media platform (abstract; paragraphs 0005, 0007, 0014, 0058, 0067-0073).

Consider claims 29-32 and 34, paragraphs 0005, 0007, 0014, 0058, 0067-0073 read on the claimed features.

Allowable Subject Matter

4. Claims 1-3, 9-12 and 18-22 allowed.
